1. The Team reviewed the final draft of the area structure which consists of World Regions, Water Areas and Political-Geographic Entities. Also finalized was the disposition of politico-geographic entities within World Regions, and the assignment of alphabetic codes thereto. A decoding table was also reviewed and approved.

2. The Team then turned its attention to modifiers and their use in connection with the subject structure. Two types of modifiers were proposed by [redacted]. One type (4 modifiers) for use when a commodity or equipment is involved and a second type (7 modifiers) to indicate military organization involvement. The decision to use modifiers resulted in a requirement to review and adjust the subject structure which was then undertaken.

3. The resulting revisions will be put in final form for review at the next meeting which will be held at 0930-1600 hours on 31 August 1965, Room 2E45 at CIA Headquarters.
